SUBJECT INDEX

Abuse, and suicide, 150
Accident proneness, 148. *See also* Risk taking
Acting-out adolescents. *See* Depression, in acting-out adolescents
Adolescent and Family Treatment Unit (AFTU), 347–50
Adolescent Day Service (ADS) program, 382–83
Adult patients, hospitalized, in generic milieu, 361–66
Affective disorders, developmental aspects of, 257–58. *See also* Bipolar illness, Brain asymmetry, Manic-depressive illness
Affective system, disorders of, 256
Aggression, 121
  in Holocaust survivors, 70
  as natural part of adolescence, 143
  and suicide, 149
  see also Violence
Alienation
  in Holocaust survivor families, 70
  in unemployed youth, 33–34
Ambiguity, as a stage in crisis of unemployment, 28–29
Anger
  in depressed adolescents, 461
  in unemployed youth, 32–33
Anorexia nervosa, 427, 431–51
  as adolescent disorder, 440–41
  conceptual model of, 437–38
  diet for, 447
  and family therapy, 442–43, 445–46
  history of treatment of, 431–32
  initial evaluation of, 443–45, 447
  as misguided striving for individuality, 433–35
  personality as antecedent, 435–37
  physical evaluation, 447
  psychological structure of, 432
  psychotherapy and, 450–51
  psychosomatic aspects of, 441–42
  restitution of body weight and image, 448–50
  starvation phase, 446–48
  symptoms of, 439–40
  treatment of, 443–51
  treatment principles in, 438–43
Antecedents, childhood, defined, 131–32
  See also Predictors
Antisocial behavior problems, 133–35
Antisocial personality, 148
Anxiety, in unemployed youth, 32
Apprenticeship programs, need for, 35
Attachment deprivation, 135–36
Attachment disorders
  in babies of adolescent mothers, 14–15, 21–23
  case examples of, 15–21
Autonomy, issue of, in treatment of depressed adolescents, 465–66

Biochemical state, and depression, 136–37
Biopsychosocial model, 121, 125–37
  and delinquency and violence, 133–35
  and depression, 135–37
  and development of character, 125–30
  and societal factors, 130–37
Bipolar illness
  case examples, 282–85
  basic assumptions about, 246
  clinical characteristics of, 278–80
  need to identify predictors for, 300
  offspring of parents with, 273–88
  predictors of, 245–46, 299–317
  see also Affective disorders, Manic-depressive illness
Body image, and anorexia, 432, 434, 441–42, 448–50
Borderline adolescents, follow-up study on, 494–520
  and the adolescent dilemma, 494–95
  case examples, 502–3, 505–6, 509–10, 512–13, 515
  clinical outcome for, 499–514
  clinical outcome for parents, 514–15
  developmental approach to treatment of, 495–97
  importance of continuing therapy, 516–17
  method in, 497–99
  mild impairment group, 504–11
  minimal impairment group, 501–4
  moderate impairment group, 511–13
  need for halfway houses, 517
  severe impairment group, 513–14
Borderline personality, classification of, 129–30
Borderline state, and failure of self-

definition, 75
Borderline syndrome, defined, 494
Boredom, of unemployed youth, 29, 30
Brain asymmetry, and affective disorders, 320–30
and ECT, 329–30
hemispheric specialization, 320–21
studies of brain damage, 321–23
studies of normal population, 323–26
studies of psychiatric patients, 326–29
see also Laterality
Brain damage, and affective lateralization, 321–23

Career goals, conflict of, with marriage plans, 43
CARS (Children's Affective Rating Scale), for evaluating fantasy, 294–95
Case examples
of adolescent group (therapy sessions), 370
of adolescent manic-depressive illness, 264–65
of career dilemma in female adolescent, 45–47
of childhood manic-depressive illness, 249, 259–60
of continuity and transformation from infancy to adolescence, 183–85, 186–87, 189, 191, 193–94
of failure to thrive in infant of adolescent mother, 15–21
in follow-up study of borderline adolescents, 501–2, 505–6, 509–10, 512–13, 515
of generic milieu (therapy), 367–68
of issues faced with parent counseling group, 396, 397–98, 399, 400–401, 402, 403
of Koro, 524–27
of latency-aged manic depressive illness, 261–62
of mixed milieu (group therapy), 369
of regression of hospitalized adolescents in aftercare, 408–9, 410–11, 412–13, 415, 416–17, 421–22, 422–23
in study of offspring of bipolar parents, 282–85
of therapy disposition problems with college-bound seniors, 470–75, 477–81
of violent death, 152–64
of work with hospitalized adolescents and their families, 350–57
see also Mill, John Stuart; *Portrait of the Artist as a Young Man*
Cerebral laterality, 276, 286
and manic-depressive illness, 252
see also Brain asymmetry, Laterality
Character, 125–30
biological factors, 127
cognitive developmental view of, 127–28
defined, 125
distinguished from neurosis, 126
Freud on, 125–26
redefining, 128–29
and separation-individuation, 126–27
see also Identity
"Char.cter armor," 126
Childhood antecedents, 131–32
Childhood depression, fantasy in, 292–97
Childhood manic-depressive illness, 245, 249, 252, 258–62, 274
Cognitive deprivation, 135
Cognitive development, and moral development, 230–31
Combat stress. *See* Vietnam veterans
Concrete operational stage, 128
and moral development, 231
Consolidation of individuality, 81
Contraception, adolescent questions about, 219
Countertransference
defined, 382
of staff in adolescent milieu treatment, 382–90
Creative personality, 102–3

"Dampened down" state, 257
Day care, for babies of unmarried adolescent mothers, 8
Death rate, 121, 122, 140–42. *See also* Violent death
Decision making (psychiatric), for high school seniors. *See* Therapy disposition for college-bound seniors
Deidealization, 234–35
Delinquency, 133–35. *See also* Juvenile delinquents
Demoralization, in unemployed youth, 33–34
Denial, as defense
at time of discharge, 413–14
in anorexic, 436
Depression (economic), and unemploy-

ment studies, 24
Depression (psychological)
in adolescent mothers, 8–9, 13–14
antecedents for, 135–37
predictors of bipolar illness in adolescents with, 299–317
in unemployed youth, 33
see also Manic-depressive illness
Depression (in acting-out adolescents), 455–67
acceptance and reassurance in treatment of, 462–63
etiology of, 455–57
humor in treatment of, 464–65
importance of taking a stand, 459–61
and individual psychotherapy, 457
and issue of autonomy, 465–66
negative transference in treatment of, 461–62
therapist as ego ideal, 463–64
treatment and disappointment, 458–59
treatment strategies, 457–58
Depression, childhood, fantasy in, 292–97
"Depressive equivalents," 456
Deprivation, and depression, 135–36
Despair, as stage in crisis of unemployment, 29
Detachment strategies, in Holocaust survivor families, 71
Developmental conflicts, of adolescence and motherhood, 9–14
Developmental theory, and treatment of borderline adolescents, 495–97
Diagnosis
of childhood manic-depressive illness, 288
of manic-depressive illness, 251, 265–67
Differentiation, 81
Dissociation, as stage in gay identity, 62
DSM
on affective disorders, 256
on bipolar disorders, 246–47
in diagnosis of offspring of bipolar parents, 279
on posttraumatic stress disorder, 241

Ego ideal, therapist as, 463–64
Ego identity, 3
right of homosexual to develop, 55, 62–63
Ego psychology, 172
ECT (electroconvulsive therapy), and brain asymmetry, 329–30
Emotional development, 132–33
Epilepsy, and brain asymmetry, 322–23
Epiphanies, James Joyce's concept of, 82–83

Failure to thrive, case example of, 15–21
Families
emancipation from and therapy disposition for college-bound seniors, 476–82
and hospitalized adolescents, 344–50
regression of, after discharge, 412–13
see also Family therapy, Parent counseling group, Parents
Family history, and bipolar disorders, 249–50, 308–11. *See also* Genetic factors
Family therapy, mandatory in treatment of anorexics, 442–43, 445–46. *See also* Parent counseling group
Fantasies (sexual), adolescents' questions about, 215–16
Fantasy, depressive, 251
Fantasy, in childhood depression, 292–97
Fathers, relationship to and creativity, 103
Fear, in unemployed youth, 32
Female sexuality, adolescent males' questions about, 200–205
Follow-up interviews, in peer-relationships-as-predictors study, 486–87
Formal operational thought, 128, 231

Generic milieu, 361–64
approach of hospital, 365–66
benefits of, 364–65
as community, 362
criticisms of, 362–63
description of units in, 366
case examples of, 367–68, 369, 370
groups in, 366–71
patient responsibilities and staff roles in, 366–67
Genetic factors
and manic-depressive illness, 248
and psychiatric illness, 267
Group counseling. *See* Parent counseling groups
Guilt, in unemployed youth, 31–32

Halfway houses
need for, 517

and regression problems, 421–22
Handedness, and bipolar illness, 277, 286. *See also* Laterality
Holocaust survivors, children of, 4, 66–72
psychological problems of, 69
significance of family for, 68
studies on, 67
and survivor reaction theories, 69–71
uniqueness of, 66
Homophobia, 52
as a prejudice, 53–55
Homosexuality, 4, 52–63
adolescents' questions about, 220–21
and depersonalization of sexual encounters, 60–61
fear of, 52, 53–55
and gay identity, 62–63
hiding, 52, 57–62
and isolation, 58–62
prejudice against, 52, 53–55
and social identity, 55–57
Hospitalized adolescents
Adolescent and Family Treatment Unit (AFTU), 347–50
adolescent group for, 369–71
benefits of generic milieu, 360–71
case examples, 350–57
characteristics of, 344–45
development of support services for, 361
families of, 345–46
history of handling, 360–61
and hospital, 346–47
in milieu with younger children, 373–80
papers on, 339–42
play therapy with, 377–78
regression of during discharge, 407–24
role of parent counseling group, 391–405
and separation issues, 343–58
special problems of, 360–63
and staff countertransference, 382–90
see also Generic milieu, Peer relationships, during hospitalization
Hypochondriases. *See* Koro

Idealism, in Vietnam veterans, 233–34
Idealization of parent, 100
by John Stuart Mill, 88–89
Identity
problem with term, 75
see also Character, Ego identity, Individuation, Social identity
Identity diffusion, in unemployed youth, 30–31
Individuation
Portrait of the Artist as a Young Man, as record of, 75–83
subphases of, 81
See also Separation-individuation
Infancy and adolescence, continuities and transformations between, 122, 182–96
case examples, 183–85, 186–87, 189, 191, 193–94
eating patterns, 185–86
play and work patterns, 190–91
risk-taking patterns, 194–96
sleeping patterns, 185–86
and sexuality, 191–93
socializing patterns, 187–89
Infants, attachment disorders in, 14–23
Ingroups, and social identity of homosexuals, 55–56
Isolation, of homosexuals, 58–62

Joyce, James. *See Portrait of the Artist as a Young Man*
Juvenile delinquents and violent death, 122, 147–66

Koro, 429, 523–30
case report, 524–27
and defense mechanisms, 527–28
defined, 523
and identity confusion, 527

Latency-aged children
hospitalized with adolescents, 373–80
manic-depressive illness in, 261–62
Laterality, and manic-depressive illness, 252. *See also* Brain asymmetry, Cerebral laterality, Handedness
Lithium, to treat manic-depressive illness, 253, 260, 262, 267–69
Loss, and depression, 135–36
Love, tragic adolescent, 112–15

Males (adolescent)
questions about sex asked by, 200–205
revision of object representations in, 199–206
Manic-depressive illness, 245–53, 256–64, 273–88
in adolescence, 262–65

behavioral profile for, 258–59
brain asymmetry in, 327, 328
case examples, 259–60, 261–62, 264–65, 282–85
in childhood, 245, 249, 252, 258–62, 274
clinical features of, 263–64
criteria for diagnosis of, 288
depressive stage of, 247
description of, 246–47, 256–57
diagnostic aspects of, 251, 265–67
family history of, 249–50, 273–88
in latency-aged children, 261–62
and laterality, 252
manic phase of, 247
predictors of, 251
premorbid characteristics of, 274–75
risk research on, 245
subjects and methods in study of, 276–77
temperamental features of, 248
treatment of, 252–53, 267–69
see also Affective disorders, Bipolar illness
Masked depression, 292–93, 456
Masturbation, adolescent questions about, 317–18
